

## Competitor Bulletin #1

03/11/2009

### Topic: Optional Fuel Stop

Friday's event will be approximately 93.5 stage and transit miles per leg. There will be an optional fuel stop after Stage 3 and before Stage 4. This will be approximately 34.5 miles from the fairground service area.

The organizers will provide transit for your fuel containers to the fuel stop should you need to add fuel. The crews will need to add their own fuel, and no other service will be allowed. Ten minutes have been added to the transit time for fueling. The Rally America refueling rules will apply.

Should you require fuel to be taken to the optional stop, please contact John Sundelin at 480 250-6590 no later than 8:00 AM Friday morning.

Saturday's event will be approximately 91.8 stage and transit miles per leg. The transit between stage 2 and 3 and stages 6 and 7 passes right by a gas station. The organizers do not have permission to add gas from cans anywhere on this route. If this poses a problem for your team, please contact John Sundelin at 480 250-6590 and Desert Storm will make every effort to effect a solution to your fuel needs.
